Pinned Docker image: one container per repetition, 1 CPU, no network
Dynamic baselines
A fixed, B warning,
C output, C' input,
C'' read-then-written
E: plan on host,
run in container
Corpus
15 documents
expected.json written
before implementation
Ground truth N*
8 unconditional passes,
state and text equal
through pass 8
External tools
latexmk, latexrun,
Tectonic, Typst ports
D: static analysis
on host, no engine
results.jsonl
15 x 7 x 10 = 1050
records
